## **TimpTE Industries, Introduces 50 Foot American Ag Series Tri-Axle**

*TimpTE's constant devotion to innovation continues.....*

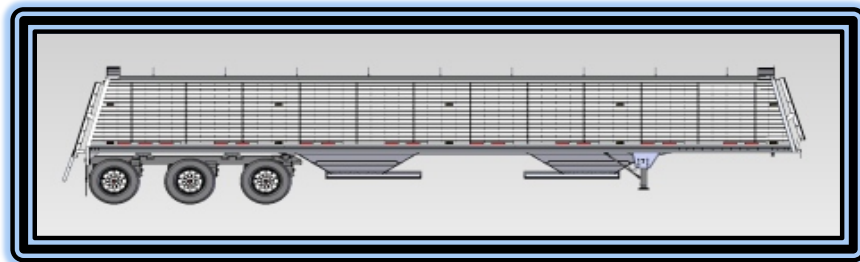

David City, NE (November 9, 2011) – TimpTE Industries, The industry leader in manufacturing dry bulk commodity trailers, is proud to announce the expansion of the American Ag Series product line. This product line will now include a 50 foot American Ag Series Tri-Axle Model. Production of this model will begin roll off the assembly line December of 2011.

The 50 Foot American Ag Series Tri-Axle has been designed for consumers who prefer the look, style, and ease of access of the 15 degree front and rear slope. Because of the Tri-Axle model design, consumers will have the ability to haul larger payloads in states that allow higher weights with multiple axles. The American Ag Series contains top-of-the-line features, much like the legendary Super Hopper that was introduced in 1980.

TimpTE's trailers are engineered to be lightweight and rugged, but most importantly, to offer years of dependable service. In addition, engineering has perfected the smooth, aerodynamic side walls for maximum fuel efficiency. A wide variety of options are offered for all TimpTE trailers, and each trailer is backed by a three year "Peace of Mind" limited warranty.

TimpTE has built a reputation on quality, commitment to service, and a never ending pursuit of excellence.
