

POWERED EZ LOAD DECK SYSTEM

Raise and lower your deck bed with one push of a button on your wireless remote or use the main switch located in the toolbox. Trailer features a four-degree approach angle and can be loaded or unloaded without the need for ramps. Deter thieves and save space by storing equipment on the trailer in its lowered position while not in use.

ALL ALUMINUM CONSTRUCTION

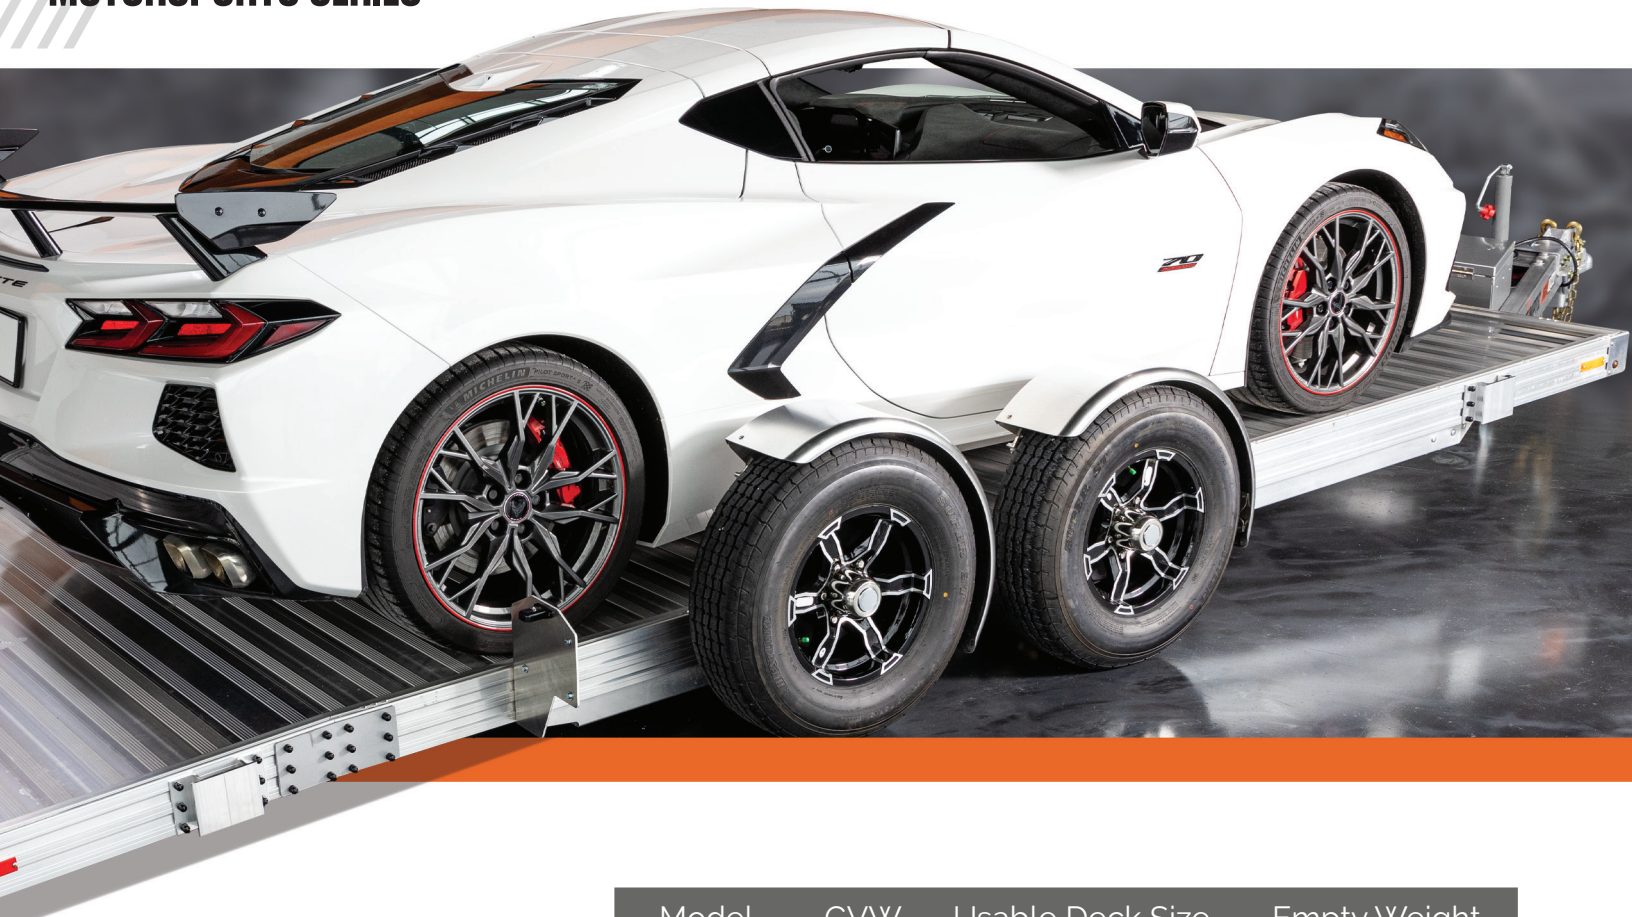

The extra hauling capacity you want and the strength you need! Mechanically fastened joints replace failure-prone structural aluminum welds. Proprietary extruded aluminum components such as the main c-channel frame, side rails and deck material enable these lightweight trailers to deliver reliable performance that is easy to haul.

WIRELESS REMOTE OPERATION

Raise the trailer from inside or outside your loaded equipment.
